

## WAXING INFORMATION

Nufree is the gold standard in hair removal and is carried by thousands of professional salons throughout the world. It was developed over 25 years ago to help plastic surgeons remove hair from a patient before surgery. Here are just a few of the reasons why Nufree is the most effective hair removal treatment in the world.

- Nufree is NOT A WAX and never sticks to the skin.
- Nufree is self-preserving antibacterial/ antimicrobial so its safe, clean and germ free.
- Nufree is completely BOTANICAL and safe for the entire body.
- Nufree doesn't dry and can be erased any time!
- Nufree is scientifically tested and uses no animal products.

Most importantly we do not double dip & we wear gloves throughout the service. After waxing, we apply Finipil which come from NUFREE. It is an antiseptic cream bacteria that cools and soothes the skin while protecting the empty hair follicle. It also protects against ingrown hairs and increases the time between hair removal treatments when used in conjunction with Nufree.

PLEASE NOTE: We do not provide waxing services for anyone 17 years old & younger without being accompanied by a parent & parent must be present in the room with their minor.
